

# BUS SERVICES

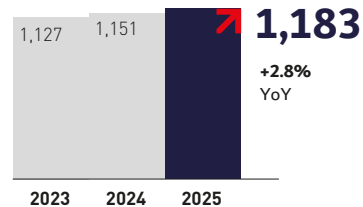

**DTC's bus operations continued to grow steadily in 2025, with the fleet increasing 2.8% to 1,183 vehicles by year-end. The Company strengthened its position as a trusted provider of school and commercial transport, supported by long-term contracts with the Ministry of Education.**

A new partnership with Etihad Rail marked an important step in expanding intermodal mobility, with DTC buses to serve as first- and last-mile connections for rail passengers. The integration underscores DTC's contribution to a more connected and efficient transport network across the UAE.

Technology remained central to performance improvements, with DTC's smart systems enabling real-time route tracking, safety monitoring, and predictive maintenance. The DTC School Bus App allowed parents to monitor journeys in real time and receive notifications on arrivals and route changes, reinforcing transparency and safety.

Fleet size (as of 31 December)
